# METOO EVENT
Sexual Boundary Violations, Erotic Transferences/Countertransferences, & Erotic Perversions

With Andrea Celenza, PhD.

This Salon will provide mental health clinicians with guidance on how to understand the problem of sexual misconduct from a variety of perspectives, including precursors, risk factors, supervisory concerns, psychodynamic underpinnings, preventative methods, and rehabilitation efforts.

“Among mental health professionals, sexual boundary violations are recognized as unethical due to the power imbalance inherent in the structure of the therapist-client dyad. Within the therapeutic context, the relationship is structured by the asymmetric distribution of attention wherein the psychotherapist learns a great deal about the client while the reverse is not true. This type of relationship encourages transference-based illusions derived from early childhood, rendering the client particularly vulnerable to exploitation.”
